Bright House Networks to add 35 new, popular HD channels by end of year

Company also set to launch 'Start Over,' a free feature enabling digital customers to restart, pause and rewind select shows

INDIANAPOLIS (Tuesday, Oct. 20, 2009) – In a drive to provide substantially more high-definition programming to its central Indiana customers, Bright House Networks will add 35 new high-definition news, sports and entertainment channels to its lineup starting in November.

"Before the year ends, we will have more than 80 high-definition channels for our digital customers throughout central Indiana to enjoy, with plans to exceed 100 high-definition channels in early 2010, most of which will be available at no additional charge," said Bright House Networks President Buz Nesbit. "Bright House Networks continuously builds its library of offerings and remains committed to delivering quality entertainment, including more high-definition channels, to our customers."

Bright House Networks is also soon launching Start Over in central Indiana. Start Over enables customers to restart, pause and rewind certain shows if they tune to that show at any time during the broadcast. The use of Start Over is simple. When tuning to a Start Over-enabled show in progress, customers are alerted to the feature through an on-screen prompt. By pressing "Select" on the remote control, the program is restarted from the beginning.

This exciting new technology will be offered exclusively to all central Indiana Bright House Networks digital customers at no additional charge.

"Start Over will provide our digital customers the ability to go back and catch the beginning of a show they missed," Nesbit said. "This new feature gives our customers even more control of when they watch and how they watch their favorite programming."

Start Over will be available on certain shows and channels where programmers have provided rights to utilize Start Over with their programming.
